

Explanation of your grades:

Q1-Q5 are your quiz grades over 10, **Q_Avg** is their average. **Midterm**, **Final** are your actual exam grades. **F2** is the higher of the Midterm, Final grades and **M2** is the lower one. Your overall grade (**Overall1**) is computed as:

0.5*F2 (50% of your higher grade) + **0.4*M2** (40% of your lower grade) + **Q_Avg** (Quizzes affect 10%)

In the OBS System percentages are entered like this before I took over: Vize(35%), KısaSınav(15%), Final(50%)
So the grades entered should be:

Vize(**M3**) = **M2**, KısaSınav(**Q3**) = $100 * (\text{Q_Avg} + 0.05 * \text{M2}) / 15$, Final(**F3**) = **F2**

As you can see in **Overall2** then the system will compute your overall grade exactly as the intended one **Overall1**

ID												System Grades			Overall2
	Q1	Q2	Q3	Q4	Q5	Q_Avg	Mid	Final	M2	F2	Overall1	F3(50%)	Q3(15%)	M3(35%)
